Sarath S Nair

Staff Software Engineer @Twilio Inc. | Ex-Salesforce | Front End |
JavaScript | ReactJS
Bengaluru, Karnataka, India

Summary

I am a Software Engineer with extensive experience in creating large-scale enterprise web applications for Fortune 100 companies like Salesforce, Walmart, Oracle, and Twilio. My expertise lies in UI development and I am proficient with modern JavaScript frameworks and web tooling, including React & Redux, ES2015+, Webpack, and NodeJS. I am also familiar with service-oriented and microservices architectures, and have a keen interest in full-stack development.

★ At Twilio, I lead the migration of Taskrouter and Flex Console pages, ensuring seamless transitions and successful handovers. I developed the Email dashboard, Activity feed, and participant roster features, contributing significantly to the Email feature's launch. I also played a key role in the development of the Video in Flex feature and the UI side of the Unified Profiles initiative across Twilio. Additionally, I manage customer escalations, monitoring, and on-call support in the admin UI, ensuring efficient issue resolution and high customer satisfaction.

★ As one of the founding engineers of the Salesforce CDP India team, I contributed to developing various screens of the product, including Data Ingestion, Data Modelling, Actions/Action Targets, Unified Profiles, Calculated Insights, Data Spaces, and Data Explorer.

★ At Walmart, I was involved in re-platforming the Walmart Canada e-Commerce platform (walmart.ca) using the Electrode framework, which handles millions of visits per day. I developed reusable UI components in React.js, implemented internationalization, and created solutions for real-time marketing content.

★ I was part of the product development team for Oracle Field Service Cloud, managing real-time operations for over 100,000 field technicians. I redesigned the Dashboard and Reports module using

KnockoutJS, PHP, and Oracle JET framework, and optimized SQL queries to enhance report generation performance.

★ I worked on redesigning and re-platforming Walmart Mexico (www.walmart.com.mx) and Walmart Mexico Sam's Club (www.sams.com.mx) e-Commerce applications using React, AngularJS, and Flux. I was also involved in developing Walmart UK toYou, a parcel delivery/return service from ASDA.

Skills: HTML, CSS, JavaScript (ES6), ReactJS, Redux, Redux Thunk, Redux-Saga, NodeJS, NPM, Yarn, Lerna, Babel, Webpack, Flow, CSS Pre-processors (LESS, SASS), CSS in JS, HapiJS, Unit Testing (Jest, Enzyme, Karma, Mocha), AngularJS, RequireJS, KnockoutJS, Git, JIRA, Browser Developer Tools, OneOps (Cloud), Jenkins, Agile
